# expansion joints

**Installation of Expansion Joints:**

- When the duct is shorter than 50 ft, no Expansion Joint needed.
- When the duct is between 50 ft up to 200 ft, install one Expansion Joint at the mid point.
- If the duct is longer than 200 ft, install one Expansion Joint every 200 ft apart.
- Expansion Joints should be located as close as possible to the quarter point of the conduit span.

Note: All Expansion Joints have a yellow line on the nipple end of the joint for proper installation.

Alignment/Expansion fitting is sometimes referred to as an Expansion/Deflection joint.

(The clamps holding the rubber sleeve connecting the two nipples are made from stainless steel for corrosion protection.)

Note: All Expansion Joints have a yellow line on the nipple end of the joint for proper installation.

Split anchor rings are always supplied in pairs and are used for above ground installations in order to create fixed points. The split anchor rings are placed around the hanger closest to the mid point between two expansion joints. One pair of split anchor rings is placed on each side of the hanger. The split anchor rings are bonded with epoxy adhesive to the outside of the conduit. The hanger where split anchor rings are used is called an anchor hanger and is normally braced, see Bridge Hanger section in this catalog.

For further information, use your smart phone's camera or QR code scanner to learn more about Champion Fiberglass split anchor rings.

Champion Fiberglass Slip Collars allow unrestricted expansion/contraction movement of RTRC conduit while still providing proper support to the conduit system. The Slip Collars eliminate the expansion/contraction binding that naturally occurs in traditional pipe clamp installations.

The advantages of Champion Fiberglass Slip Collars include:

- Can be used with steel or fiberglass pipe clamps.
- Available in black or grey epoxy.
- Heavy-duty wall thickness collar allows for considerable pipe clamp tightening without any force transfer to conduit.

## REDUCING ADAPTER

Transition adapter from ID/tubular fiberglass conduit to IPS type and PVC schedule 40 and 80.

This adapter is used for transition between different diameters of fiberglass conduit.

Note: These are just examples of some reducing adapters. Contact Champion Fiberglass directly for other reducers.

## OFFSET BEND

When manufacturing offset bends, the vertical offset dimension, H, and the horizontal offset dimension, L, must be provided. All offset bends are supplied with 6" (152 mm) straight tangents. (Item numbers for offset bends end with the suffix "-47".) Contact Champion Fiberglass directly for additional information, part numbers and pricing.

## WOBBLE COUPLING

Wobble couplings are used for minor vertical and horizontal offsets for above ground installations. (Item numbers for wobble couplings end with the suffix "-48".) Contact Champion Fiberglass directly for additional information regarding dimensions, part numbers and pricing.
