

# Champion Strut™ Pipe and Conduit Hangers

Champion Fiberglass is the leading manufacturer of pipe and conduit hangers. For over 28 years, our hangers have been recognized for their ability to make your installations easier and more cost efficient. You'll find them on pipe racks, bridge and DOT applications all over the world – and as every application is unique, Champion Fiberglass will work with you to provide specialized designs if needed.

For further information, use your smart phone's camera or QR code scanner to view the **Champion Fiberglass Bridge Hanger Video**, which details how to install hangers (spacing) and how to locate the conduit expansion joints, split ring anchors and anchor hangers.

## Features

All hangers are constructed from the following grey polyester fiberglass components; special colors can be customized upon request.

- 1/2" x 2" FRP flat bar
- 1" x 1/8" FRP round tube
- 1/4" x 2" FRP square tube

Steel Champion Bridge Hanger Rods can be supplied in the following 3/4" diameter options.

- 3/4"-10 HDG
- 3/4"-10-304 stainless steel
- 3/4"-10-316 stainless steel

**Domestic steel must be specified if required.**

## Customization

- You can create customized piping/conduit hangers on our website – visit [championfiberglass.com/product/champion-hangers](http://championfiberglass.com/product/champion-hangers) to begin.
- Scroll down to "Get Estimate" and choose Intermediate or Anchor Hangers.
- Click the configuration you'd like a quote on. Fill out the quote form and hit the "Submit" button, or print/save to mail to Champion Fiberglass. Someone will contact you.

## Availability and Installation

Champion Fiberglass will provide all information and technical assistance required.

- Fiberglass hangers are recommended for fiberglass piping and fiberglass electrical conduit to prevent abrasion during expansion/contraction.
- Pipe and Conduit Hangers can be installed and used with all piping and conduit material types.
